

## DESCRIPTION

### **Decia Cover**

is a non-toxic shielding / shading removable product developed for the fruit and vegetable sector. The desired shading effect is obtained by easy preparation and application. The detergent Decia Clean is required for the removal at the end of season.

## PHYSICAL CHEMICAL CHARACTERISTICS

<b>COLOR</b>	white
<b>APPEARANCE</b>	matt
<b>COMPOSITION</b>	water-based solution, chemically bonded copolymer
<b>SPECIFIC WEIGHT</b>	1.45 ± 0.05 Kg/Lt
<b>FIXED RESIDUE</b>	65 ± 1%

Note: these properties are typical and are not to be considered specific. Marginal deviations of values do not affect the efficacy or property of the product.

## USAGE CHARACTERISTICS

<b>TEMP. USAGE</b>	Between +18 °C and +32 °C
<b>DILUTION</b>	300-500% according to shading target
<b>TOOL</b>	spray
<b>SUPPORT:</b>	plastic film, several types

**SUPPORT PREPARATION:** the substrate must be dry, both in the case of new support or treated with previous painting. On new substrates it is advisable to carry out the first painting in optimal climatic conditions, so that problems of poor adhesion to the support itself will not occur. In any case, it is always recommended to apply **Decia Cover** with dry weather conditions and forecasts of not strong humidity or rain in the following days.

Note: the success of the application cycles is conditioned by a correct preparation of the support. The one described in the sheet represents a minimum condition that must be integrated with the professionalism and experience of the operator

## **APPLICATION**

It is recommended to mix the product thoroughly with dilution water and keep stirring during application. To obtain more shaded layers, the already present layer must be completely dry. In this way, a stronger shield can be obtained. A strong dilution of the product will reduce the characteristics of resistance to atmospheric agents of the product both in the first application and in next.

## **PACKAGING**

Plastic buckets Lt. 14, tanks Lt. 1000

## **GENERAL NOTE**

The product is sensitive to frost. We recommend that you keep it at temperature between + 5 ° and + 25 ° C. Preserved in packaging original tightly closed, and not diluted with water, has a long storage period.
